

Job Description

QA Engineer

Department: Product

Type: Permanent

Location: Amsterdam or remote

Hours: 32 - 40 workinh

Reports to: QA Lead

Salary: Competitive + bonus and stock

Posted: August 2021

Our Core Values

Achieve anything with a healthy and happy team

Push boundaries through direct communication and diversity

Act responsibly and protect the data

Amaze through user-friendly and rewarding experiences

Maximize research impact

About the role

At Castor, we're all committed to a world with faster, smarter, medical research. Our cloud based software solutions are revolutionizing data capture for academic and commercial researchers worldwide. You've found yourself a company with a true purpose.

Our QA team makes sure that all our products are tested before a new version is released to the public. The goal of the entire team is to prevent bugs and inconsistencies from reaching our customers. With an eye for detail and a creative mindset, you will be contributing to that goal.

In this role, you will be improving the quality of our products and help to identify and execute a strategy to enhance it even higher.

What you'll be doing

- Manually executing regression test cycles
- Writing test cases and maintaining large regression test suites
- Performing functional tests on newly developed features
- Automating end-to-end tests
- Automating API tests
- Communicating test results, defects and possible risks with product team and development team

What you'll bring

You'll definitely have:

- Experience in testing in an Agile environment
- The ability to assess business impact of defects
- Excellent level of English, both verbal and written
- Experience in maintaining large test suites

It would be good if you had:

- Experience in writing automated tests
- Experience in testing API's
- Relevant understanding of clinical guidelines: ICH-GCP - Good Clinical Practice, 21 CFR Part 11 - Electronic audit trails, national and international legislation pertaining to clinical trial methodology including The Declaration of Helsinki
